Free Printable Thanksgiving Mini Album

For best results print your mini album pages onto cardstock. You can print on both sides of the paper to give it a double-sided scrapbook paper look. If you have difficulty lining it up so that it matches on both sides you can try printing each side and then cutting them out and gluing them back to back. This makes for a nice, strong page and allows you to easily mix and match the different pages. You can print as many of the pages as you want for your mini album and using different combination you will have different looks for every page.

For the tabs and tags you can also print on cardstock. The collage sheet images can be printed on regular paper or cardstock.

We hope you enjoy this free printable mini scrapbook.

Remember this is for personal use only.
